

Adhesive Rainbowl Color Vinyl Sticker Instrucions

These rainbwl color vinyl stickers are not for sublimation or heat transfer. They are designed for personalization on glossy hard surfaces. Work with Cutters and Transfer film.

1

1. Use vinyl cutter to cut your design on the color side. Don't mirror the image.

2

2. Trim, peel and weed away all the excess. Only leave the cut-out pattern.

3

3. Cut a piece of Medium-tack transfer film and apply it on the pattern.

4

4. Flip it over with the trasfer film down, and remove the back film of the vinyl.

5

5. Fix the pattern on the item, smooth it out and peel off the transfer film slowly.

6

6. Your design got transferred perfectly.

Notice:

- A TEST CUT IS ALWAYS RECOMMENDED.
- NOT heat transfer vinyl/NOT printable vinyl/NOT work with inkjet or laser printers.
- Please note that colors appear slightly different on computer monitors.
